Selected Projects

- **Misunderstood (Web Dev & Interaction Design):** Co-developed a gamified educational platform; engineered a **JSON-driven** architecture for dynamic content rendering and scalability. Implemented **immersive interactions** like a 3D swipe quiz and interactive map, establishing a modular design system to ensure 100% visual consistency.
- **FlavorPath (Product & Branding):** Led the 0-1 **product strategy** by mapping a complex ecosystem of 5+ stakeholder groups to validate business viability beyond user desirability. Established the complete **visual identity system** and designed 10+ high-fidelity screens. Synthesized diverse team inputs into the "International Traveler" persona, successfully aligning product features with key market needs for cultural authenticity.
- **Ella (Service Design):** Developed a supportive community and **mobile platform** for elderly breast cancer survivors, addressing rehabilitation challenges and organizing events; achieved 90%+ satisfaction in pilot tests.
- **Echo (iOS Feature, Product Design):** Designed a photo annotation feature with text, tags, and voice memos; conducted 15+ **user interviews** and ran **A/B tests** (60+ users) to verify 60% efficiency gain in voice annotation.
